

धर्म क्षेत्र

DHARMA KSHETRA

Digital Tools Policy & Reference

Aelius Parallel Holdings Pvt Ltd · For all employees, new and existing · Version 1.0 · FY 2026–27

1. Welcome to Dharma Kshetra

This document is your guide to the digital tools that run our company. Whether you are joining us for the first time or have been with us for years, धर्म क्षेत्र · **Dharma Kshetra** — literally "the field of dharma" — is where our work assembles. It is the single home screen from which every employee opens their day, and from which every internal tool is reached in one click.

The name comes from the opening line of the Bhagavad Gita: धर्मक्षेत्रे कुरुक्षेत्रे — "on the field of dharma, the field of the Kurus." Just as the Gita begins on a field where warriors assembled to do their work, our home screen is the field where our team assembles daily.

Access the portal here: sankalp79git.github.io/dharma-kshetra/ (live) · Bookmark it. Set it as your browser homepage. See **Section 6** for setup instructions.

2. Why the Sanskrit Names?

Every tool on Dharma Kshetra carries a Sanskrit name drawn from the Bhagavad Gita, the Mahabharat, or classical Sanskrit tradition. This is a deliberate choice, and a personal one.

These tools have been built **indigenously** — inside AeliusParallel, by us, for us. Every line of code, every workflow, every dashboard reflects our own way of working. It felt inadequate to give them generic English acronyms when something far richer was available: the wisdom of our own civilisational inheritance.

The Gita and the Mahabharat, together, contain the entire spectrum of human character — the truthful and the deceitful, those who work hard with pure karma and those who scheme with bad intent. And the Gita, sitting at the heart of it, gives us the framework to act, to think, to work rightly among them. These are not just stories. They are mirrors.

The hope behind these names is simple: that as you use these tools every day, they will do more than label software. They will quietly remind you of the spirit in which the work is being done — the karma being accumulated, the kind of human being you are choosing to be, the kind of company we are building together.

3. Focus for the Year — FY 2026–27

Four principles guide our year. You will see them at the top of Dharma Kshetra every morning.

- 1** नीति · **Ethics**
Do what is right — especially when no one is watching.
- 2** सहयोग · **Cooperation**
We move together, or not at all.
- 3** मार्गदर्शन · **Mentored Growth**
Each one lifts the next — knowledge passed forward.
- 4** लोक कल्याण · **Doing Good for Society**
Our work must serve the world beyond our walls.

4. The Thirteen Tools

These are the internal tools that run our operations. Click any name to open the tool directly. All are also reachable from Dharma Kshetra in one click.

1. नित्य यज्ञ Nitya Yajna

PMS · DWM — Production Management System

The daily production management and daily work management platform. Owned by the plant. Used for scheduling, batch tracking, and production dashboards. Every daily production run is one nitya yajna — an offering of daily disciplined work.

Open: <https://sankalp79git.github.io/aphl-dashbaord/>

Gita 3.9 — यज्ञार्थात् कर्मणोऽन्यत्र

2. त्रिकाल दर्शन Trikal Darshan

ADI — Revenue Analysis & Forecasting

Aelius Data Intelligence — the revenue-analysis and forecasting engine across entities. Named for the sage's vision that sees past, present, and future together — exactly what revenue analysis requires.

Open: <https://sankalp79git.github.io/Aphl-ADI/>

Gita 7.26 — वेदाहं समतीतानि

3. गाण्डीव Gandiva

Veridian Sales Intelligence

Sales intelligence for the Veridian & SeaSoul brands — territory, SKU, and channel performance. Named after Arjuna's divine bow — the instrument of ekalakshya, single-pointed aim.

Open: <https://veridian-salesintelligence.web.app>

Mahabharat — Arjuna's bow

4. पार्थ सारथी Partha Sarathi

Veridian Compass — AI Market Strategy

AI-assisted market and strategy compass for the Veridian sales team. Krishna as sarathi did not fight Arjuna's war — he guided the chariot. That is the role this tool plays.

Open: <https://veridian-salesintelligence.web.app/compass>

Mahabharat — Krishna as charioteer

5. सत्य नषिठा Satya Nishtha

PQC — Product Quality Complaints

The tool for logging and resolving product-quality complaints. Truth in what we deliver to the customer, spoken with care.

Open: <https://sankalp79git.github.io/aphl-dashbaord/aelius-pqc.html>

Gita 17.15 — सत्यं ब्रूयात् प्रयिं ब्रूयात्

6. योग क्षेम Yoga Kshema

AIM — Asset & Inventory Manager

Asset and inventory manager — tracking what we own, what needs replenishment, and what needs protection. Krishna's promise to devotees: I carry their welfare (yoga) and their security (kshema).

Open: <https://sankalp79git.github.io/aphl-dashbaord/aelius-aim.html>

Gita 9.22 — योगक्षेमं वहाम्यहम्

7. अभिमिन्यु Abhimanyu

NPD-to-Live — New Product Development

Manages new products from concept through development to launch. Abhimanyu learned the chakravyuha while still in his mother's womb — the perfect metaphor for a product learning the market before it's born as FG.

Open: <https://sankalp79git.github.io/aphl-dashbaord/abhimanyu.html>

Mahabharat — the warrior who learned in the womb

8. धर्म कोश Dharma Kosha

BMS — Budget Management System

Multi-entity budget management with verticals, approvals, and analytics. Budget allocation is a test of dharma — deciding fairly who gets what.

Open: <https://sankalp79git.github.io/APHL-BMS/>

यतो धर्मस्ततो जयः — Where dharma is, victory follows

9. कुल वृक्ष Kula Vriksha

HRMS — Human Resource Management

The people system — joiners, roles, scorecards, MoM, access management. Every joiner becomes part of the kula, a branch of the family tree.

Open: <https://group-hrms.web.app>

Rig Veda 10.191 — सङ्गच्छध्वम्

10. लक्ष्मी पात्र Lakshmi Patra

FG Registry

The finished-goods registry. Every SKU ready to earn revenue is a vessel of Lakshmi — and tradition says she resides only where there is order and cleanliness.

Open: https://sankalp79git.github.io/aphl-dashbaord/APHL_FGR.html

श्रीः कान्ता समर्पिता

11. वदिर Vidura

Distributor Claims & Audit

Distributor claim processing, verification, and audit. Vidura was the incorruptible examiner of Hastinapur — the same eye we bring to each claim.

Open: <https://vidura-veridian.web.app>

सत्यमेव जयते — Truth alone prevails

12. मतिव्यय Mitavyaya

Expense & Petty Cash Management

The expense-management and petty-cash tool. Neither miserly nor wasteful — mitavyaya is the classical virtue of measured, mindful spending.

Open: <https://sankalp79git.github.io/APHL-BMS/mitavyaya.html>

अतिसर्वत्र वर्जयेत् — Avoid all excess

13. नारद Narada

Social Media & Broadcast

Social media planning, scheduling, and outreach. Narada moves between worlds carrying the message — the original divine messenger, now serving our modern broadcast function.

Open: <https://narada-6cv.pages.dev>

वाणी सर्वत्र गच्छति — The word travels everywhere

5. Client-Facing Tool

One tool stands apart from the thirteen internal ones — it is shared with our customer.

सत्य दर्पण Satya Darpan [AELIUS × PILGRIM]

ADI-OC — Open-Book Costing (Client-Facing)

The one tool we share with our customer (Pilgrim). Open-book costing — showing our real costs, holding up a mirror of truth. The Aelius × Pilgrim relationship rests on this trust.

Open: <https://sankalp79git.github.io/ADI-OC/>

सत्यमेव जयते

6. Getting Started — For a New Joiner

Step 1 — Access

Your manager or HR will confirm which tools you have been given access to based on your role. Not every employee needs access to every tool. If you cannot log in to a tool you believe you should have access to, contact HR (कुल वृक्ष · Kula Vriksha) or your reporting manager.

Step 2 — Bookmark Dharma Kshetra

Once your access is set up, open sankalp79git.github.io/dharma-kshetra/ in your browser and bookmark it. This is your daily home base.

Step 3 — Set It as Your Browser Homepage

In **Microsoft Edge**: Settings → "Start, home, and new tabs" → "Open these pages" → Add sankalp79git.github.io/dharma-kshetra/. Do the same under "Home button".

In **Chrome**: Settings → "On startup" → "Open a specific page" → Add the same URL.

Step 4 — Explore, but Focus on What Your Role Needs

You do not need to master all thirteen tools on day one. Focus on the two or three that your role actually uses daily. Return to this document any time you need to know what a tool does.

7. Good-Citizen Rules for Using the Tools

These tools carry our company's data — customer information, supplier information, financial information, personnel information. Please:

- **Log in only from your own account.** Do not share your credentials with anyone, including colleagues.
- **Enter accurate data.** A dashboard is only as reliable as what you type into it. Take the extra minute.
- **Do not download or share data externally** without your manager's explicit approval.
- **Log out when leaving your workstation** — especially on shared computers or in the plant.
- **Report bugs or issues honestly.** Send them to your reporting manager or directly to the digital-tools team. A bug reported is a bug that can be fixed.
- **Never edit or delete records that are not yours** unless your role explicitly authorises it.
- **Treat the tools with the same respect as physical company property.** They cost time and care to build.

8. Email & Team Communication

Dharma Kshetra includes one-click access to your Microsoft 365 tools:

- **Open Outlook** — outlook.office.com — your official email for all internal and external correspondence.
- **Open Teams** — teams.microsoft.com — for chat, quick calls, video meetings, and file sharing within the team.

Use Outlook for anything you would want to keep a written record of. Use Teams for quick back-and-forth. Please use these official channels — not personal WhatsApp — for company matters.

9. Support, Bugs & Feature Requests

All internal tools are actively developed and maintained. Your feedback is what makes them better.

- **For a bug or issue with a tool** — report it to your reporting manager, who will escalate it to the digital-tools team.
- **For a feature request or improvement idea** — the same route works. Practical suggestions from daily users have shaped many of these tools.
- **For access issues** — HR (Kula Vriksha) is your first stop.
- **For urgent production-affecting issues** — contact your reporting manager immediately by phone, not email.

10. A Final Note

The Mahabharat teaches that what we do every day — our नित्य कर्म · nitya karma — is what shapes who we become. If we perform our daily work with the spirit of yajna, with the focus of Arjuna, with the truthfulness of Yudhishtira, we will not only build a better company — we will, slowly, become better human beings.

That is the real hope behind these tools and this home screen. Welcome to the field.

धर्मक्षेत्रे कुरुक्षेत्रे

On the field of dharma, we assemble.
